

Dear Colleagues

I want to thank you for all your efforts so far regarding protecting our home and our people. Well done you – well done us! <3

However, the situation in the society calls for a reminder:

I would like to emphasize the fact that if you experience any symptoms at all that could indicate a Covid-19 infection DO NOT COME TO WORK, but call in sick and go for testing.

Unexplained feeling of a „hangover“, weakness, a cold, sore throat, coughing, fever, musclesoreness, impaired sense of taste and/or smell, etc.... DEMANDS TESTING!

You can register for screening in heilsuvera.is – using electronic identification or call you local doctor (heilsugæsla) or Læknavaktin -1700. If you have any problem getting screened you can always talk to your department manager (deildarstjóri).

Summing up:

1. DO NOT come to work with any symptoms.
2. DO NOT come to work while waiting for your results from a covid-screening
3. DO NOT come to work if you are in quarantine
4. DO NOT come to work if you have been around someone you know that has tested positive and you are waiting to be officially put in quarantine.

Hand hygiene, respecting the 2m rule, using masks, respecting mass restrictions (10 or less) and being careful within the society are the actions that will get us through this wave of Covid-19.

All for one and one for all!
